

menu interactivo en python con bucle while True

The screenshot shows a Google Colab notebook titled "MenulInteractivo.ipynb". The code in the cell is as follows:

```
1 while True:
2     print("introduce una letra de la a-z:")
3     print("Usted debe saber cual elegir si esta autorizado")
4     print("elija una letra ahora para salir: ")
5     opcion = input("Elige una opcion: ")
6     if opcion == "a":
7         print("Ingreso autorizado")
8     elif opcion == "b":
9         print("ingreso no autorizado")
10    elif opcion == "c":
11        print("debes salir")
12        break
13    else:
14        print("opcion invalida Errorr")
```

The output pane shows the execution of the code. It first asks for a letter between a-z. The user types 'a', which is recognized as authorized. Then it asks again for a letter between a-z. The user types 'c', which is recognized as 'debes salir' (you must leave). The loop then exits.

This screenshot shows the same Google Colab notebook and code as the previous one. However, the user's input 'c' is now recognized as an invalid option ('opcion invalida Errorr') instead of 'debes salir'. The rest of the interaction remains the same, asking for a letter between a-z and recognizing 'a' as authorized.
